EDUCATION

Government College of Engineering Nagpur	**Nagpur, Maharastra**
Btech in Electronics And Telecommunication	Graduation Date: Apr 2025

Relevent Coursework : DBMS, Data Structures & Algorithms, Operating Systems, Web Technology, Computer Networks

WORK EXPERIENCE

Fireblaze Ai School	**Nagpur , Maharastra**
Full Stack Developer Intern	May 2025 - Aug 2025

- Engineered key **admin panel features** within ignite.fireblazeaischool.in, reducing **administrative task completion times** by 30% and improving **real-time data accessibility**.
- Developed responsive and **scalable React.js UI components**, integrating Firebase (Firestore, Auth, Hosting) to enhance user experience and reduce page load time by **20%**
- Collaborated with a **cross-functional Agile team**, managing version control via GitHub and deploying production-level features that supported **30+ active users daily**.

Shyno Technology	**Remote(West bengle)**
Web Developer Intern	Jul 2024 - Jan 2025

- Developed and optimized invoice generation, billing, and sales tracking modules for ShyBiz.com, cutting manual workload by 40% and improving performance by 25%.
- Implemented **advanced inventory management features** (low stock alerts, expiry tracking, valuation) and integrated **secure OTP-based authentication** for seamless access.
- Built **responsive dashboards with PHP & MySQL**, supporting **barcode scanning** and delivering real-time insights that improved business accuracy by **35%**.

PROJECT EXPERIENCE

MyShop – E-commerce Web Application | [Code](#) | [LiveProject](#)

Next JS,, MongoDb ,Node.js, Express.js

- Built a fully responsive, full-stack e-commerce platform with secure role-based authentication for separate admin and user portals.
- Enabled users to seamlessly browse products, manage carts, place orders with flexible payment methods, track deliveries, and download invoices.
- Designed an intuitive admin dashboard to efficiently manage products, monitor stock, process orders, update statuses, and oversee complete delivery workflow.

Job Portal | [Code](#) | [LiveProject](#)

ReactJs , MongoDb , Node js , Express js

- Developed a dynamic Job Portal application using the MERN stack where users can register and log in as either Job Seekers or Job Posters
- Seekers can apply for jobs posted by Job Posters, while Job Posters can post job listings and view job applications. The project also includes a search functionality to help users easily find relevant job listings.

Event Management | [Code](#) | [LiveProject](#)

NextJS , MongoDb, Node js , Express js

- Developed **role-based dashboards**: users can view/register for events, track progress, and receive notifications; admins can post events, approve/reject applications, and monitor payments.
- Implemented free & paid events with integrated payment tracking (pending, processed, completed) and designed the system to be scalable for future features like analytics, reminders, and ticketing.

SKILLS & INTERESTS

Languages: C++/C , Python , JavaScript , SQL

Frontend: Rect JS , Next Js , Tailwind Css

Backend: Node Js , Express Js , Php , Reset Api

Database: MongoDb , FIrebase , MySql
